## Multi Port

The optimal solution to park many jets in a row

Our **Multi Port** consists of **modular floating cubes** 50 x 50 x 40cm and **body parts** 100 x 100cm equipped with **horizontal** and **side rollers**. The entry part is V-shaped with a 1st roller at water level. The **raised-bow head part** welcomes the bow of your jet ski.

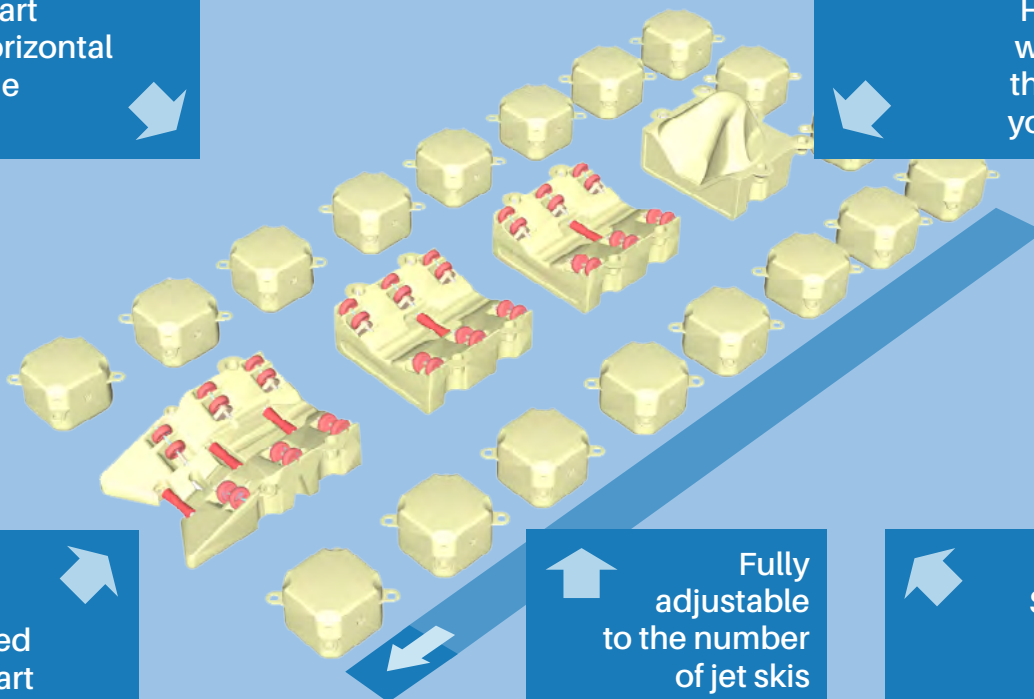

Body part  
with horizontal  
and side  
rollers

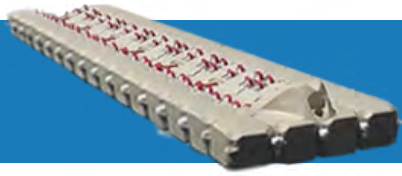

Head part  
welcomes  
the bow of  
your jet ski

V-shaped  
entry part

Fully  
adjustable  
to the number  
of jet skis

Structure  
made  
of cubes

Main advantage of floating cube platform is its complete modularity. Thus, it is fully possible to adapt the platform to the number of jet skis you own, simply in adding slipway elements and cubes. We bid two basic models: the Multi Port 4 and Multi Port 6 to dock 4 or 6 engines.

## Multi Port 4

Platform of 7,60m x 3,50m - Ideal to park 4 jet skis

### Features

- Head parts: 2
- Slipway elements: 10
- Entry part: 2
- Cubes: 46
- Screws, nuts: 32

## Multi Port 6

Platform of 11,60m x 3,50m - Ideal to park 6 jet skis

### Features

- Head parts: 2
- Slipway elements: 18
- Entry part: 2
- Cubes: 70
- Screws, nuts: 48

## Anchoring

There are several ways to anchor the Multi Port, depending your situation's characteristics and number of jet skis. Visit our website which outlines all our types of anchoring or call us and together we will determine the appropriate technical solution.

## Accessories

The unique design of our floating cubes allows integrating a wide range of accessories in order to custom your drive-on dock in accordance to your needs. Indeed, thanks to the fixing ears on the 4 sides of each cube, assembling these accessories is a breeze. Discover all our accessories on our web site.
